

2030 Vision Statement

In 2030, the City of Delavan will be a vibrant, healthy community that offers its residents diverse opportunities to live, work, raise families, and enjoy the full benefits of small city life.

The City's historic downtown and neighborhoods will continue to serve as thriving centers of community activity and a link to the City's colorful past. Newer neighborhoods will embody the same small-town feel, yet will be unique places and destinations in their own right.

The City's economy will be diverse and robust; offering a range of employment, shopping, service, and entertainment opportunities, while the City's public services and institutions will continue to enhance residents' daily life and sense of community. All of the City's buildings, businesses, and neighborhoods will make more efficient, sustainable use of energy, water, land, and other valued resources, and residents will enjoy the benefits of safe and clean streets, air, and water.

The Delavan area's lakes, rivers, woodlands and farms will continue to define and sustain the City. Residents and visitors alike will have more opportunities than ever to experience these places through the City's interconnected parks and trails.
